

REQUIREMENT BRIEF — MODULE II

RECRUITMENT & SELECTION AUTOMATION SYSTEM

Background & Objective

The University proposes to automate the existing SOP for Recruitment & Selection within the HR Change Management & Automation System (Module I), covering manpower planning, sourcing, and selection, linked to the Central Employee Database and the Open Positions Tracker.

As the manpower-planning approval chain and the selection process differ for Academic (Faculty & Lab Technician) and Non-Academic (Non-Faculty) positions, the system shall support these as two distinct, configurable workflows, while sharing a common Sourcing and CV Database engine across both.

1) Manpower Planning Workflow (Faculty & Lab Technician and Non-Faculty)

- a. The system shall trigger an automated manpower-requirement communication at least four (4) months before the start of the semester / academic year — from the Associate Dean (Academics) to the Deans of Schools for Faculty & Lab Technician positions, and from HR to the concerned Department Heads for Non-Faculty positions — to assess manpower requirements (faculty and technical workload for Faculty; operational needs, workload analysis, replacement requirements, or expansion of services for Non-Faculty).
- b. The concerned Dean / Department Head shall submit the finalized requirement — Deans, along with the teaching load in the prescribed format (Attachment 1), within 15 days of the communication (Faculty); and Department Heads, as a Manpower Requisition Form (MRF) restricted to one planned requisition per year, with urgent replacement MRFs permitted at any time (Non-Faculty) — the system shall track the applicable deadline with reminders.
- c. The system shall route the submission for review and vetting — to the Associate Dean (Academics) for Faculty & Lab Technician positions, and to Head HR for Non-Faculty positions (to be completed at least three (3) months before the start of the academic year) — with provision to seek clarification / additional information from the concerned Dean / Department Head.
- d. The Associate Dean (Academics), for Faculty & Lab Technician positions, / Head HR, for Non-Faculty positions, shall consolidate the submission(s) along with recommendations and forward them to the Hon'ble Pro-Chancellor within 15 days of receipt; the system shall track this SLA.
- e. The Hon'ble Pro-Chancellor's approval shall be communicated back to the concerned Dean (within 7 days, for Faculty & Lab Technician positions) / Department Head (Non-Faculty positions); the system shall track and notify accordingly.
- f. On approval, the system shall enable the concerned Dean to immediately raise a Manpower Requisition Form (MRF) and route it to the HR team, for Faculty & Lab Technician positions (for Non-Faculty positions, the MRF is raised at the requisition stage itself, as at (b) above).

- g. HR shall initiate the recruitment process (newspaper and social media advertisements) within 7 days of receiving the MRF; the system shall track this SLA. Along with this RCS tracker would be made.
 - h. The system shall flag / track that the entire recruitment process is completed — at least one (1) month before the start of the semester for Faculty & Lab Technician positions, and at least fifteen (15) days before the candidate is required to be onboarded for Non-Faculty positions — with the target date auto-calculated accordingly.
 - i. For urgent or replacement requirements arising from an employee's resignation, the system shall allow the concerned Dean / Department Head to raise an ad-hoc MRF at any time, routed to the Associate Dean (Academics) / Head HR for vetting, with the process tracked as follows:
 - Replacement clock starts on resignation acceptance by the School Dean, auto-notifying Head HR.
 - System tracks MRF submission → vetting → Pro-Chancellor approval as sequential SLA stages, with reminders on overrun.
 - Sourcing → shortlisting → Selection Committee Meeting tracked as one monitored block.
 - Post-selection evaluation, approval, and offer-letter issuance tracked stage-wise, with auto-generated offer letter.
 - Candidate-side milestones (offer acceptance, notice period, verification, joining) tracked through to onboarding, closing out the cycle and updating the Open Positions Tracker.
 - j. All approved manpower positions (Faculty & Lab Technician and Non-Faculty) shall be recorded and automatically maintained in the system-based Open Positions Tracker (Attachment 3 format), to be completed within 30 days.
- 2) The system shall publish / advertise the approved position across configured channels (print media, social media, University website) linked to the approved MRF, categorized by position type.
 - 3) The system shall auto-generate weekly progress reports to Management on the status of open / pending positions.
 - 4) The system shall capture applications received through designated email IDs and channels (Facebook, Instagram, LinkedIn, website, newspaper advertisements, internal references, and platforms such as Internshala for interns) into a central CV Database.
 - 5) The system shall auto-segregate and classify applications, and enable shortlisting against the position's educational qualification and experience criteria (including UGC norms, where applicable).
 - 6) Shortlisted applications shall move to the recruiter-calling stage; call inputs shall be captured in the system in a set format (RCS) and routed to HOD-HR for feedback.

- 7) On completion of shortlisting, the inputs shall be routed to Management for approval before the interview process is initiated.

Selection Workflow

A) Faculty & Lab Technician Recruitment (Academic Positions — Teaching Faculty, Teaching Associates, Technical Assistants, Lab Technicians)

- a. The system shall support the Selection Committee Meeting (SCM) process as outlined in the statute, including digital invitations to SCM members (including the external subject expert) with resumes and the evaluation sheet shared through the system.
- b. The system shall support scheduling of the interview in online mode, with provision for offline mode in exceptional cases.
- c. The system shall allow the evaluators to enter the marks in the evaluation sheet.
- d. The system shall compile SCM member feedback into an evaluation matrix and route it to Management along with the HR recommendation.
- e. On receiving Management's final recommendation and cost approval, the system shall auto-generate the Letter of Intent (LOI); on acceptance, the candidate shall be recorded as "Yet to Join" in the internal HR database.

B) Non-Faculty Recruitment (Non-Academic Positions)

- a. The system shall support three rounds of interviews for non-academic positions — Technical (conducted by the Department Head / subject expert), HR (conducted by the Head of HR), and Management — with feedback recorded in a digital evaluation sheet assessing job knowledge, communication skills, and attitude.
- b. On receiving Management's final recommendation and cost approval, the system shall auto-generate the Letter of Intent (LOI); on acceptance, the candidate shall be recorded as "Yet to Join" in the internal HR database.
- c. The system shall auto-share internal reports with HODs, Deans, and Admin / System teams for "Yet to Join" candidates, to ensure pre-onboarding requirements are completed on time.

Approval Hierarchy

- 1) Faculty & Lab Technician — Manpower Planning: Associate Dean (Academics) → Hon'ble Pro-Chancellor.
- 2) Faculty & Lab Technician — Selection: Selection Committee (incl. external subject expert) → Management.
- 3) Non-Faculty — Manpower Planning: Head HR → Hon'ble Pro-Chancellor.
- 4) Non-Faculty — Selection: Technical Panel → Head HR → Management.
- 5) This should have a database change methodology consistent with Module I, so that every requisition, approval, sourcing, shortlisting and selection stage — across both the Faculty and Non-Faculty tracks — is time-stamped, with a complete audit trail and version history.

Reports

HR shall provide the list and format of the various reports required to be generated (including, at minimum, the weekly open / pending positions report, the CV Database / sourcing report, the shortlisting and interview funnel, and the "Yet to Join" tracker, for both Faculty and Non-Faculty positions).

There may be addition / deletion to these reports over time. Provision for generation of real-time reports should be there.

Enclosures

1. Manpower Requisition Form (MRF)
2. Teaching Load / Workload Format — Attachment 1
3. Position / Vacancy Specification Format — Attachment 2
4. Open Positions / JR Tracker Format — Attachment 3
